Signature, Date (Podpis, datum):

Principles of financing publication costs from the Open Access Fund ("Fund") of BC Director

- (1) Only publications with either AIS above 1,2 or TOP 15 % based on the scientific field will be supported.
- (2) Publication should be based on the research carried out mainly in the Biology Centre (first and corresponding author employed at BC; exceptionally at least one of them).
- (3) Journal, where the work is accepted for publishing, should be ranked by WoS in Quartile 1 in its scientific area. Any exception shall be approved by the BC Director.
- (4) In general, authors may ask for up to 50 % support from the Fund.
- (5) Authors are required to indicate any support for publication costs obtained from other funds.
- (6) A particular team of authors may receive the support from the Fund no more than twice in a given calendar year.
- (7) Authors are required to submit the request form together with payment instructions (proforma, invoice, etc.). Refund requirements for co-financing of publication costs from OA Fund already paid from other sources will not be accepted.
- (8) Requirements for co-financing of non-mandatory open access fees will only be accepted if the open access is required by the provider of research funding.
- (9) Applications may only be granted until the Fund is drained in a given calendar year.
